

MONJAIYE ADEBOYE

Full-Stack Software Engineer

Lagos, Nigeria • +234 705 691 5165 monjaiye@gmail.com

GitHub: github.com/jaiy3 • Portfolio: <https://jaiyeadeboye-portfolio.vercel.app>

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with professional experience developing enterprise software and building modern web applications using React, Node.js, Express, PostgreSQL, and Prisma.

Experienced in backend development, REST API design, authentication, database integration, and responsive frontend development. Holds a First-Class B.Sc. in Computer Science and is passionate about building scalable, maintainable software.

TECHNICAL SKILLS

Languages

JavaScript • TypeScript • Python • C# • C++ • SQL

Frontend

React • TypeScript • HTML5 • CSS3 • Tailwind CSS • Vite • React Router • Axios • Responsive Design

Backend

Node.js • Express • REST APIs • JWT Authentication • Zod Validation

Web3 & AI

Ethereum • Wagmi • RainbowKit • Viem • WalletConnect • Alchemy • OpenAI • OpenRouter

Databases & Tools

PostgreSQL • Prisma ORM • Git • GitHub • Postman • Railway • Render • Vercel • VS Code

FEATURED PROJECTS

TeamFlow — Full-Stack Project Management Platform

- Developed and deployed a full-stack project management platform using React, TypeScript, Express, PostgreSQL, and Prisma.
- Implemented JWT authentication, workspace and project management, task tracking, comments, activity logging, and responsive UI.
- Deployed the frontend on Vercel and backend on Railway with automated Prisma migrations.

AtlasAI — Web3 Portfolio Analytics Platform

- Developed and deployed a full-stack Web3 portfolio analytics platform using React, TypeScript, Express, PostgreSQL, Prisma, Wagmi, and RainbowKit, integrating Ethereum wallet data, ERC 20 balances, transactions, live market prices, WalletConnect, Alchemy, and AI-powered portfolio insights.

ApplyFlow — Full-Stack Job Application Tracker

- Designed and developed a full-stack job application platform with JWT authentication, CRUD functionality, analytics dashboard, filtering, Zod validation, and a responsive React interface.
- Deployed using Vercel and Railway with PostgreSQL and Prisma.

Blockchain-Based E-Voting System

- Developed a blockchain-powered electronic voting prototype featuring REST APIs, peer-to-peer communication, and proof-of-work consensus.

Personal Portfolio Website

- Built a responsive React portfolio showcasing projects, skills, and experience with reusable components.

PROFESSIONAL EXPERIENCE

Backend Developer | Parallag Technologies (2023–2025)

Developed and maintained backend functionality using C#, JavaScript, and Python. Implemented features, resolved production issues, and improved application stability. Participated in testing and iterative software improvements.

Software Engineering Intern | Bluechip Technologies (2022)

Contributed to a bank-grade cash management platform used by Nigerian financial institutions. Assisted with feature implementation, testing, and database validation.

EDUCATION

Babcock University

B.Sc. Computer Science (First Class)

CGPA: 4.62 / 5.00

Graduating Class Executive President (BUGC)

Google Developer Student Club (GDSC)
