JavaScript • Python • C# • C++ • SQL

Frontend

React • HTML5 • CSS3 • Vite • Responsive Design

Backend

Node.js • Express • REST APIs • JWT Authentication

Databases & Tools

PostgreSQL • Prisma ORM • Git • GitHub • Postman • Railway • Vercel • VS Code

PROFESSIONAL EXPERIENCE

Backend Developer | Parallag Technologies (2023–2025)

- Developed and maintained backend functionality using C#, JavaScript, and Python.
- Implemented features, resolved production issues, and improved application stability.
- Participated in testing and iterative software improvements.

Software Engineering Intern | Bluechip Technologies (2022)

- Contributed to a bank-grade cash management platform used by Nigerian financial institutions.
- Assisted with feature implementation, testing, and database validation.

FEATURED PROJECTS

ApplyFlow — Full-Stack Job Application Tracker

Designed and developed a full-stack job application platform with JWT authentication, CRUD functionality, analytics dashboard, filtering, Zod validation, and a responsive React interface.

Personal Portfolio Website

Built a responsive React portfolio showcasing projects, skills, and experience with reusable components.

Blockchain-Based E-Voting System

Developed a blockchain-powered electronic voting prototype featuring REST APIs, peer-to-peer communication, and proof-of-work consensus.
